

Stagsike Trail - allow 1 - 2 hours (4.5 kms)

Fairly level mostly on good tracks around farmland and bottom of Bruthwaite Woodland, some muddy patches - allow for a break at Stagsike Cottages, and time to enjoy the woodland edges between Stagsike and Howgill

Bruthwiate Trail - allow 2 - 3 hours (3 kms)

Steep and rough ground among the newly planted woodland - add 1 hour to Stagsike Trail

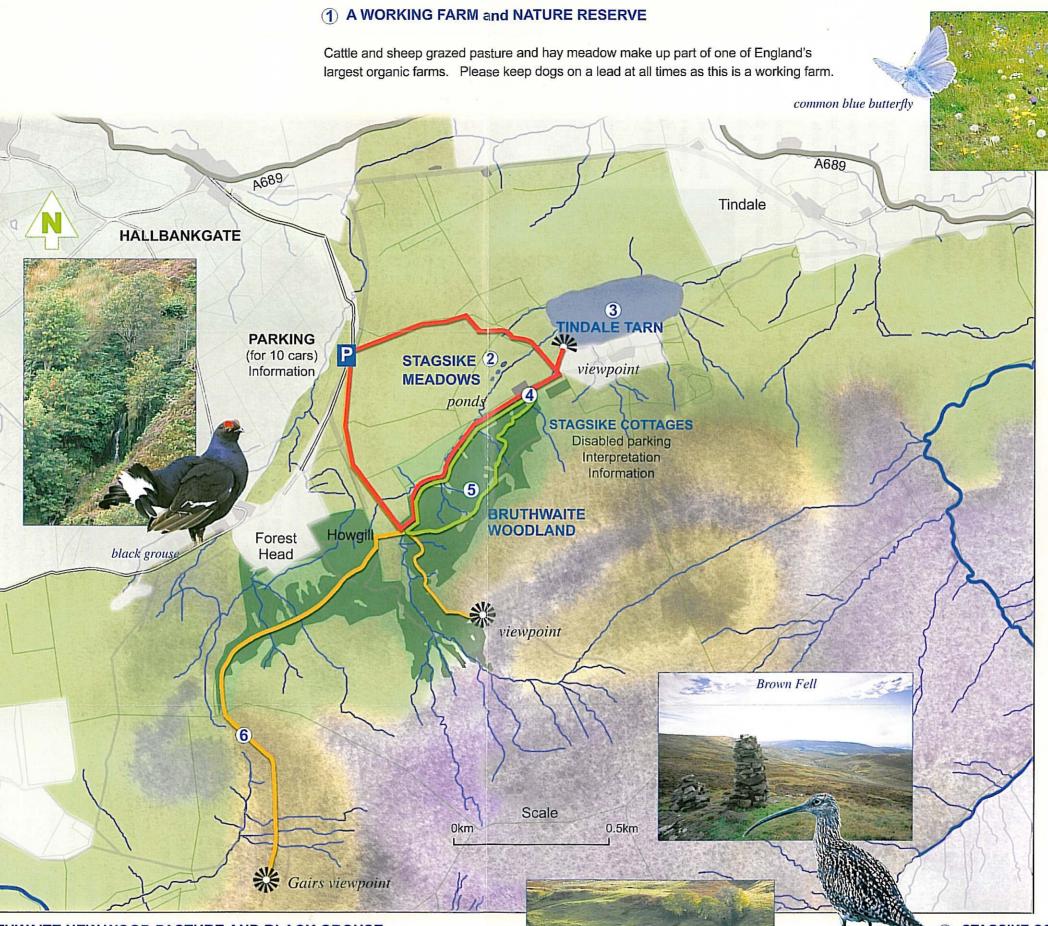

Moorland Trails - allow 3 hours Gairs viewpoint (8 kms) Bruthwaite viewpoint (4 kms)

Longer walks out to the moorland Please do keep to trails and footpaths to enjoy wildlife without causing disturbance

6 MOORLAND TRAILS -AND BIRDS OF PREY

The longer trail takes you onto the moorland.
Kestrel and buzzard are common,
but watch out for peregrine,
merlin, short-eared owl
and if you are very lucky
hen harrier.

② STAGSIKE MEADOWS

Here we combine traditional hay meadow management with a network of small wetlands. Lapwing, curlew, snipe and redshank all nest here. View from near to the cattle pens or from Stagsike Cottages.

(3) TINDALE TARN

A view point allows you to watch the Tarn without disturbing the birds. Autumn and winter are especially good for seeing a range of wildlfowl.

5 BRUTHWAITE NEW WOOD PASTURE AND BLACK GROUSE

Black grouse need a rich habitat. Woodland is one aspect - tree buds provide winter food and woodland edge gives cover. Heather, berries, cotton grass, undisturbed feeding areas, and insect-rich habitat for chicks are all needed. Black grouse can be seen to symbolise diversity - a place with black grouse is a place with room for wildlife.

curlew

Stagsike Cottages

Here you can take a break on your walk at the Interpretation Point and learn about the history and management of the reserve. Vehicle access to this point is restricted to pre-arranged visits, to keep the peace and quiet for your enjoyment.
